

### Reverification PRQ (Pre-Review Questionnaire)

**Q** Are the structure and questions for the reverification PRQ the same as those for the initial PRQ?

**A** Yes, the reverification PRQ mirrors the structure of the initial PRQ, encompassing the same questions and templates which are essential for the reverification process.

---

**Q** Since the reverification cycle is every 3 years, when filling out the templates, do I need to provide data for every year within the 3-year cycle, or just for the year of the verification visit?

**A** You must submit 3-years of information for the following templates:

- General Questions: Surgeon Roster Template
  - Standard 2.3 Geriatric Surgery Quality Committee: Committee Roster Template
  - Standard 4.1 Geriatric Surgery Nurse Champion: Continued Education Template and QI Projects Template
  - Standard 6.1 Data Collection and Review: Data Collection and Review Template
  - Standard 7.1 Geriatric Surgery Quality Improvement/Process Improvement Project: QI/PI Project Template
  - Standard 8.1 Geriatric Surgery Community Outreach Project: Community Outreach Project Template
- 

### Reverification Site Visit Day

**Q** Are there any differences between an initial site visit and a reverification site visit?

**A** The site visit agenda for both reverification and initial site visits remains the same. However, hospitals have the option to skip the "Hospital Tour" portion (*for virtual visits only*) if there are no significant updates or highlights to showcase. This flexibility could result in shorter reverification site visits.

---

**Q** Do hospitals have the option to choose a virtual or in-person site visit for reverification?

**A** Hospitals have the option to choose a virtual or in-person reverification site visit.

---

Q

Is the chart review process for reverification the same as for initial site visits? Additionally, does the chart review timeframe still adhere to a 12-month lookback window?

A

The process is the same for reverification as it is for initial site visits. The hospital will be required to submit a *Chart Review List* of a specified timeframe (*12-month lookback*) and site reviewers will choose 30 of those charts to review on the day of the site visit.
